

MAY 2022

Lake Forest Hospital Paramedic Program Participates in Hands-on Training Hosted by Lake Bluff Fire Department

Lake Bluff Fire Department assists in extrication and patient management training with the 2022 Lake Forest Paramedic Cohort.

In the most dangerous motor vehicle accidents, patients may become trapped or pinned by the damage to the vehicle. As part of the Lake Forest Paramedic Program, students learn how to care for these patients while they are still trapped in the vehicle and awaiting removal by firefighters. With the Assistance of the Lake Bluff Fire Department, students practiced assessing, treating, and coordinated removal of 12 victims over three scenarios during the full day of training.
